

Important News, effective as of July 18, 2008

Dear Business Friends;

In vitro Sweden AB, In vitro Eesti OÜ, Medinova Scientific AS and Medprobe AS are very happy to announce that we have teamed up under one umbrella in Scandinavia and the Baltics.

This new collaboration will increase our presence in the Nordic region, and strengthen our marketing and sales of all products/services throughout the region and will hence be very beneficial for all our customers and all our suppliers.

Our aims have always been and will continue to be to provide excellent service and high quality products from our suppliers throughout the region.

There have been intense and extensive dialogues with the owners of MedProbe AS in Norway to see if we could establish a cooperation with the "In vitro"-companies. We found that to work with Medprobe would offer several advantages and synergies in sales, marketing and logistics, combining the market of Norway with the markets of Sweden/Denmark/Baltics hence achieving a pan Scandinavian & Baltic marketing organisation. We have known Medprobe for many years, and they do add a scientific approach and knowledge, which they have become highly respected for, to the In vitro/Medinova group.

Medprobe AS have a staff of 10 people, 8 in Oslo Norway and 2 in Lund, Sweden, and they distribute selected products in Norway, Sweden Denmark Finland and Iceland. All in all, our new organisation will have 29 people in 5 offices.

It is our sincere hope that the positive waves from this acquisition will be kept and even further enhanced in this new format, which we know will be successful to all of us.

Haakon R. Torgersen
